Advances in Operational Research in the Balkans

XIII Balkan Conference on Operational Research

Series: Springer Proceedings in Business and Economics

- Showcases recent advances in operational research with both theoretical and practical research results
- Highlights international co-operation in operations research, especially among the Balkan countries
- Includes applications and case studies in a different areas such as financial decision making, marketing, e-business, project management, scheduling, traffic and transportation

This book presents recent theoretical and practical advances in operational research (OR). The papers focus on a number of key areas including combinatorial optimization, integer programming, heuristics, and mathematical programming. In addition, this volume highlights OR applications in different areas such as financial decision making, marketing, e-business, project management, scheduling, traffic and transportation. The chapters are based on papers presented at the 13th Balkan Conference on Operations Research (BALCOR). BALCOR is an established biennial conference. The selected papers promote international collaboration among researchers and practitioners, with a particular focus on the Balkan countries.
