A. Migdalas, Aristotle University of Thessaloniki, Greece; **A. Sifaleras**, University of Macedonia, Naoussa, Greece; **C.K. Georgiadis**, University of Macedonia, Thessaloniki, Greece; **J. Papathanasiou**, University of Macedonia, Edessa, Greece; **E. Stiakakis**, University of Macedonia, Thessaloniki, Greece (Eds.)

Optimization Theory, Decision Making, and Operations Research Applications

Proceedings of the 1st International Symposium and 10th Balkan Conference on Operational Research

- ▶ **Presents new models and new solutions to problems of practical interest such as business and finance optimization, e-commerce, marketing, military, telecommunications, and agricultural applications**
- ▶ **Discusses the most recent theoretical results for problems of academic interest such as statistics & stochastics, mathematical programming and modeling, and optimization software**
- ▶ **Includes articles on advanced solution methods and efficient algorithms that tackle important problem classes**

Over the past two decades, the Balkan Conference on Operational Research (BALCOR) has facilitated the exchange of scientific and technical information on the subject of Operations Research and related fields such as Mathematical Programming, Game Theory, Multiple Criteria Decision Analysis, Information Systems, Data Mining, and more, in order to promote international scientific cooperation.

The contributed papers contained in this volume consist of 25 selected research papers based on results presented at the 10th Balkan Conference & 1st International Symposium on Operational Research in Thessalonike, Greece. Subjects include, but do not restrict to, the development of theory and mathematical models for Operations Research, theory and applications of Combinatorial Optimization, Supply Chain Optimization, and Military Operations Research.

These carefully selected papers present important recent developments and modern applications, and will serve as excellent reference for students, researchers, and practitioners in these disciplines.
